ABSTRACT

Chapter 188 of the Massachusetts Acts of 1985 established a statewide testing program that began in 1986. The Massachusetts Testing Program functions to improve curriculum and instruction in the public schools and districts, identify students needing assistance in mastering basic skills in the classroom, and make results available to the public. The Massachusetts Educational Assessment Program (MEAP) was created to accomplish the first purpose by testing students at three grade levels biennially. Results are reported at school, district, and state levels; and national comparisons are possible. The Massachusetts Basic Skills Testing Program (MBSP) was initiated in response to the second mandate. Each year students in grades 3, 6, and 9 are tested in reading, writing, and mathematics, with results reported at individual, school, district, and state levels. This document provides the results for each district or union for the MEAP (1988 and 1990) and for the MBSP (1987 through 1990). Reports are divided into the following sections: (1) local school districts; (2) independent vocational schools; (3) academic regional schools; (4) vocational-technical regional schools; (5) county agricultural schools; and (6) school unions. Tables are presented for 915 areas coded by the state and 22 school unions (937 double-sided tables). (SLD)

THE MASSACHUSETTS TESTING PROGRAM

Background

"An Act Improving the Public Schools of the Commonwealth" was signed into law by Governor Michael S. Dukakis in July 1985. This legislation, Chapter 188 of the Acts of 1985, established a statewide testing program which began in 1986.

The Massachusetts Testing Program has three purposes:

- to improve curriculum and instruction in the public schools and districts;
- to identify students needing assistance in mastering basic skills in the classroom;
- to make results available to the public.

The Massachusetts Educational Assessment Program was created by the Board of Education to accomplish the first purpose. This program tests students at three grade levels biennially. Results are reported at the school, district, and state levels; in addition, the performance of Massachusetts students may be compared with that of their peers nationally.

The Massachusetts Basic Skills Testing Program was initiated in response to the second mandate. Each year students in grades 3, 6, and 9 are tested in reading, writing, and mathematics. Results are reported at the individual, school, district, and state levels.

The table below compares different features of the two programs.

	ASSESSMENT	BASIC SKILLS
Purpose	Improve curriculum and instruction	Identify and assist students who are deficient in basic skills
Content Areas	1986: Reading, mathematics, science *1988 & 1990: Reading, mathematics, science, social studies	Reading, writing, mathematics
Grade Levels	1986: 3, 7, 11 *1988 & 1990: 4, 8, 12	3, 6, 9
Exemptions	Students incapable of performing ordinary classwork in English and who have been enrolled in transitional bilingual education programs for fewer than three full years (unless testing is requested by parent); special education students (if exemption is requested by parent)	
Testing Frequency	Biennially, in spring	Annually, in fall
Testing Time	90-120 minutes total (including questionnaire)	60 minutes per subject
Information Collected	Student test performance, background and attitude information; school and teacher background and attitude information	Student test performance; background information for Comparison Score Band
Standards	None	65% correct in reading and mathematics; minimum writing proficiency
Retesting	None	Required for students who have not passed any grade 9 test(s)
Test Booklets	Many booklets, each containing a selection of items from all subjects tested	Uniform tests for each subject
Reporting Levels	School, district, and state, with comparisons with national performance	Student, school, district, and state
Results Reported	November	January - March

* The addition of social studies and the change in grade levels between 1986 and 1988 were made to conform to the plans of the National Assessment for Educational Progress, which supplies data for the national comparisons stipulated in Chapter 188.

Objectives and test questions for both programs were developed with the advice and guidance of curriculum committees composed of Massachusetts educators and administrators. For the Assessment, the committees reviewed hundreds of test items for each grade level and selected those they deemed most appropriate for use in the Massachusetts program. The items came from previous MEAP tests, from NAEP tests, and from questions developed and field tested specifically for Massachusetts students. All questions used in the Massachusetts Basic Skills Tests were developed for the program and field tested by students in Massachusetts. All tests were reviewed by an equity concerns committee to ensure that they are fair and relevant to students of all backgrounds.

Tests used in the Massachusetts Educational Assessment Program and the Basic Skills Testing Program were designed for specific purposes. The results from each program, therefore, support valid conclusions in specific areas but may not support more general judgments about the performance of students or the quality of programs in any district. These cautions should be noted when interpreting results from the two programs:

In general, the Assessment and the Basic Skills tests:

are given at three specific grade levels and in specific subject areas	therefore	generalizing to all subjects and all grade levels can be misleading.
represent cumulative learning	therefore	results cannot be attributed to any specific group of teachers.
represent only one test, and in the case of Basic Skills, a test designed to measure mastery of minimal level skills	therefore	one cannot generalize to total achievement for the district.
produce results that reflect a variety of situations and underlying reasons for scores	therefore	one cannot generalize about reasons for performance.
are not the same as regular standardized commercial tests	therefore	results may not be the same as regular standardized tests.

Specifically, the Assessment tests:

are developed to help districts improve programs	therefore	labeling or unfairly classifying districts can be counterproductive.
provide district scores that are reported in terms of Comparison Score Bands based on socioeconomic background factors	therefore	the fairest comparisons are between districts with similar background factors.
were administered so that each student took only a portion of the total test	therefore	no individual student results are provided.
provide scores for which differences of less than 50 points are not educationally significant	therefore	scores should be examined for larger, more relevant findings.
do not provide validly generalizable results for districts with fewer than 40 students at a grade level	therefore	results for these districts should be interpreted with caution.

Specifically, the Basic Skills tests:.

are aimed at identifying students needing remedial assistance	therefore	the tests do not distinguish among levels of mastery.
are not diagnostic or prescriptive	therefore	schools are responsible for diagnosis and remediation of individual student needs.
are designed to identify individual students who need assistance	therefore	programmatic evaluation is not appropriate unless a district has high numbers and percentages of students who fail the tests.

HOW TO USE THIS BOOK

Results for the Massachusetts Educational Assessment Program for 1988 and 1990, and for the Basic Skills Testing Program for 1987 through 1990, are included in this book. Each page on the right, printed in purple, includes results for the Assessment Program for a district or union. The reverse side, printed in red, gives results for the Basic Skills Program for the same district. The data included in the tables are explained on the next page in sample shells of each report.

The reports are divided according to the categories used by the Massachusetts Department of Education in assigning code numbers to districts and schools. These categories include:

Section	Type of District	Range of Codes
I	Local school districts	001 to 350
II	Independent vocational schools	406 to 408
III	Academic regional schools	600 to 780
IV	Vocational-technical regional schools	801 to 885
V	County agricultural schools	910 to 915
VI	School unions	no code

Descriptions of these categories are provided on the tabbed divider pages that precede each section of results.

Section I: Most Massachusetts schools are included in Section I as local school districts. There are, however, several localities that do not offer schooling at certain grades but send their students to regional schools or are members of school unions. In those instances, the appropriate reference is printed in place of data for that grade level.

Sections II through V: The schools included in these sections generally enroll students from a variety of local districts for either a specialized purpose (as in the case of vocational schools) or because the local districts are too small to maintain schools at all grade levels (as in the case of academic regional schools). The data presented on those pages represent results only for the grade levels included in that particular district. No cross-references for data for other grades are provided because the references would include a large number of local districts.

Section VI: School unions are collections of districts, usually small, that hire one superintendent as the chief administrator for all districts within the union. Because these districts tend to be small, and because the Assessment Program results have greater validity for larger groups of students, the Assessment Program results are provided for unions, when available, rather than for each of the individual districts.

Assessment
Program

SUMMARY OF DISTRICT PERFORMANCE

Category

This table includes the percent of students included in the state results as well as the number and percent of students included in the district results. Students who were not included in the school report were placed into one of two categories in the reports: "Exempted", or "Incomplete or Absent."

The state-mandated exemptions are:

- students who are incapable of performing ordinary classwork in English as determined by an English Language Proficiency Assessment and who have been enrolled in transitional bilingual education programs for fewer than three full years, unless a written request was submitted by the parent that the student be tested;
- special education students if exemptions were requested in writing by the parent.

Students who did not take the entire test battery and who were not exempted were counted in the "Incomplete or Absent" category.

Content Area

This table contains the district average scores in Reading, Mathematics, Science, and Social Studies. For each grade, results are provided as scaled scores obtained by transforming the percentage of correct responses to the test questions to a common measure. For each subject, the possible range of scores is 1000 to 1600. In 1988, the mean state score for all content areas was set at 1300, with a standard deviation of 100 points. The same scale was used in the reporting of the 1990 assessment results; however, mean state scores for grades 4 and 8 increased to 1310, while the scores for grade 12 remained at 1300.

District Average Relative to Comparison Score Band

In the graphic display, the district's test results are shown as a diamond. The screened bar is the district's Comparison Score Band, which enables a district to compare its results with others with similar student background characteristics. The numeric values of the range of scores in the Comparison Score Band are also provided.

The Department of Education considers differences of less than 50 scaled score points to be not educationally significant.

Program

SUMMARY OF DISTRICT PERFORMANCE

Percent Eligible

This table includes the percent of students eligible for testing in all subjects for 1987 through 1990. The percent of students reported as "Percent Eligible" is based on the number of students enrolled in the district minus the number of students exempted from testing.

The state-mandated exemptions are:

- students who are incapable of performing ordinary classwork in English as determined by an English Language Proficiency Assessment and who have been enrolled in transitional bilingual education programs for fewer than three years, unless a written request was submitted by the parent that the student be tested;
- special education students if exemptions were requested in writing by the parent.

Decisions about exemptions are made for each test on an individual student basis. Thus, some students might take the reading test, for example, and be exempted from the writing test. As a result, bilingual and special education students could be exempted from one, two, or all three tests.

All other students, whether actually tested or not, are included in district results. Comparisons of different districts' results are difficult because the populations tested may not be comparable. Significantly larger or smaller percentages of students exempted or otherwise not tested would have an obvious impact on the results.

Percent Passing

This table provides the percent of students passing each test for the district. The Board of Education set 65 percent correct as the statewide standard to pass the reading and mathematics tests, and identified a level of skill necessary to pass the writing test.

Students who did not pass the tests were in one of two other categories not specified in this table: fail or unknown. The "unknown" category identifies students who did not provide sufficient evidence of their mastery of basic skills to make a pass/fail judgment. In reading and mathematics, these were students who were eligible for testing but did not turn in test materials, or who returned materials but made no attempt to answer any of the questions. In writing, the "unknown" category includes students who did not write an essay or who wrote an essay judged not scorable—one that was off-topic, too brief to evaluate, or returned as a rough, rather than final, draft.

All Three Tests

This table includes the number of students eligible for all three tests, as defined in the first column of this page. The number of students passing and the percent passing are also provided in this table.

Percent Passing All Three Tests

Graphic representations of the percent of students in the district passing all three tests are provided.

State Summary Results

For purposes of comparison, a summary of state results can be found on the final page of the introductory materials which precede the results for local school districts.

MASSACHUSETTS BASIC SKILLS TESTING PROGRAM

Unusual Circumstances Affecting Testing and Reports

1987-1990

Massachusetts school superintendents were asked to provide information on "any unusual systemwide circumstances that...should be included in the public reporting of the statewide test results." The responses of superintendents who chose to report such circumstances at the time the original reports were produced are as follows and should be noted when reviewing and reporting their districts' results for specific years.

1987-88

Arlington:	Due to an error in test administration, one of the two sixth grade classes at Pierce School did not submit final drafts of the Basic Skills writing sample.
Boston:	A twenty-three day bus strike adversely impacted both the numbers of students tested as well as individual student results. The first day that bus service resumed (i.e., October 13, 1987) coincided with the first day of testing. Enrollment did not stabilize immediately and the loss of instruction for many students adversely affected their performance.
Cambridge:	Original writing samples of one grade 3 class were lost. The class was retested.
Easton:	Installation of heating system was not completed at Middle School (grade 6); consequently, classrooms were extremely cold.
Framingham:	Due to an error in test administration, the scores of 25 students at the Potter Road School were invalidated. Therefore, the third grade enrollment was reported as 25 fewer than the actual enrollment.
Lawrence:	Two factors had a negative impact on the Basic Skills results for the Lawrence Public Schools. Due to the district's enormous transiency rate, the Lawrence school enrollment was not stabilized at the time of testing in October. This accounted for the high number of unknown students. Secondly, during the week of testing at Lawrence High School, there were several unforeseeable, thus unavoidable, disruptions which may have had a negative effect on testing.
Lynn:	Original writing samples of one grade 3 class were lost. The class was retested.
Medford:	Medford experienced a teachers' strike on October 5, 6, & 7, 1987.
Northbridge:	Due to constructional renovations of the junior-senior high school, students began school on September 14, approximately two weeks later than usual. Construction was ongoing, making for continued disturbances in some areas.

1988-89

Uxbridge:	Students in grades 3 and 9 were housed in buildings where substantial construction was in progress.

1989-90

Everett:	Everett experienced a teachers' strike for 2½ weeks in September.
Gill-Montague:	All Montague students in grades 3-6 were temporarily displaced to other school sites just prior to the opening of the 1989-90 school year. This condition persisted throughout the testing period.
Vocational Schools:	The class scheduling in many vocational schools limits their flexibility in scheduling testing.

1990-91

Malden:	Due to a problem with the writing test administration, the writing samples of 25 students at the Maplewood School could not be evaluated. Therefore, the passing percentage in writing for the Maplewood School is based on 25 fewer students than that for reading and mathematics.

SECTION I
LOCAL SCHOOL DISTRICTS

Results for Local School Districts

The results for local school districts are arranged alphabetically by city or town name and represent code numbers 001 through 350 as assigned by the Massachusetts Department of Education.

Most Massachusetts schools are included in Section I as local school districts. There are, however, several localities that do not offer schooling at certain grades but send their students to regional schools or are members of school unions. In those instances, the appropriate reference is printed in place of data for that grade level.

SECTION II
INDEPENDENT
VOCATIONAL SCHOOLS

Results for Independent Vocational Schools

The results for independent vocational schools are arranged by district code numbers 406 through 408 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and generally encompass grades 9 through 12. Therefore, no data are provided for other grades and no cross-references are provided, because the references would include a large number of local districts.

SECTION III
ACADEMIC
REGIONAL SCHOOLS

Results for Academic Regional Schools

The results for academic regional schools are arranged by district code numbers 600 through 780 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and comprise a variety of grade levels. If data are missing from any table, no cross-reference is provided. The missing data represent information that is available in the reports for the local districts that send students to the regional schools.

SECTION IV
VOCATIONAL-TECHNICAL
REGIONAL SCHOOLS

Results for Vocational-Technical Regional Schools

The results for vocational-technical regional schools are arranged by school code numbers 801 through 885 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and generally encompass grades 9 through 12. Therefore, no data are provided for other grades and no cross-references are provided, because the references would include a large number of local districts.

SECTION V
COUNTY
AGRICULTURAL SCHOOLS

Results for County Agricultural Schools

The results for county agricultural schools are arranged by school code numbers 910 through 915 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and generally encompass grades 9 through 12. Therefore, no data are provided for other grades and no cross-references are provided, because the references would include a large number of local districts.

Results for School Unions

The results for school unions are arranged by union number; they do not have code numbers assigned by the Massachusetts Department of Education.

A school union represents a collection of school districts headed by one superintendent. They are typically composed of small towns.

The reports for the unions include Assessment but not Basic Skills results. For Basic Skills information, see the reports for specific towns in Section I.

Below is a listing of the unions and school districts included in each:

Union 14
- Provincetown
- Truro

Union 18: Pioneer
- Bernardston
- Leydon
- Northfield
- Warwick

Union 19: Martha's Vineyard
- Chilmark
- Edgartown
- Gay Head
- Oak Bluffs
- Tisbury
- West Tisbury

Union 26: Amherst Pelham
- Amherst
- Pelham

Union 28: New Salem Wendell
- Erving
- Leverett
- New Salem
- Shutesbury
- Wendell

Union 29
- Lee
- Otis
- Tyringham

Union 31: Silver Lake
- Halifax
- Kingston
- Pembroke
- Plympton

Union 34: Freetown Lakeville
- Freetown
- Lakeville

Union 38: Frontier
- Conway
- Deerfield
- Sunderland
- Whately

Union 39
- Granville
- Sandisfield

Union 43
- Clarksburg
- Florida
- Monroe
- Savoy

Union 50: Dover Sherborn
- Dover
- Sherborn

Union 53: Pentucket
- Groveland
- Merrimac
- West Newbury

Union 54: Nauset
- Brewster
- Eastham
- Orleans
- Wellfleet

Union 55: Old Rochester
- Marion
- Mattapoisett
- Rochester

Union 60: Berlin Boylston
- Berlin
- Boylston

Union 61: Tantasqua
- Brimfield
- Brookfield
- Holland
- Sturbridge
- Wales

Union 64: Wachusett
- Holden
- Paxton
- Princeton
- Rutland
- Sterling

Union 65: Mohawk Trail
- Ashfield
- Buckland Shelburne
- Hawlemont
- Rowe

Union 66: Hampshire
- Chesterfield
- Goshen
- Southampton
- Westhampton
- Williamsburg

Union 68: Triton
- Newbury
- Rowley
- Salisbury

Union 69
